About Me

Android Developer with 3 years of experience in building scalable mobile applications across service-based (Capgemini) and product-based (Panasonic Avionics) domains. Skilled in Kotlin, Java, Jetpack Compose, and Android SDK, with expertise in Room, Flows, Firebase, and RESTful API integration. Experienced in Linux-based development environments, CI/CD pipelines, and applying clean architecture (MVVM, modularization) to deliver high-quality, maintainable apps.

Skills

- Android Java, Kotlin
- MVVM, Clean Architecture
- Dagger2, Hilt, RxJava, Retrofit, Gson, Jetpack Compose, Flows, Coroutines, Kotlin Multiplatform, JUnit
- SQLite, Room, MongoDB, Firebase, Realm
- UI/UX Design, Shell Scripting, Linux
- **Tools -** CI/CD, Android Studio, Jira, Rally, Git, Confluence, Jenkins, IntelliJ, Figma, SonarQube

Awards

March 2024 | Capgemini
Innovation Award

Oct 2023 | Capgemini India
Fiesta Spotlight Award

Experience

MTS V **Apr 2025 - Present**

Panasonic Avionics (Client- Emirates)

- Developed and optimized in-flight entertainment Android applications with Jetpack Compose, delivering responsive and intuitive UI/UX experiences for end-users.
- Implemented modularized architecture (MVVM & Clean Architecture) to enhance scalability and maintainability across large codebases.
- Integrated RESTful APIs and WebSocket-based real-time communication for dynamic content updates.
- Worked with Room, Flow, and Coroutines for offline-first data handling and seamless synchronization.
- Collaborated in a Linux-based development environment, leveraging ADB, shell scripting, Dockerized builds, and CI/CD pipelines (Jenkins) for automated builds and deployments.
- Applied unit testing (JUnit, Mockito) and UI testing (Espresso, Compose Testing) to improve reliability and reduce regression issues.

Associate Consultant **Oct 2022-Apr 2025**

Capgemini (National Stock Excahnge, Farmers Insurance)

- Designed, developed, and deployed enterprise Android solutions for multiple client projects, ensuring on-time delivery and adherence to quality standards.
- Built apps using Java and Kotlin, migrating legacy Java code to modern Kotlin-based implementations.
- Worked with Android SDK components (Activities, Services, Broadcast Receivers, Content Providers) to implement core application features.
- Integrated Firebase (Auth, Firestore, Analytics, Crashlytics) and SQLite/Room for secure authentication and robust data persistence.
- Collaborated with cross-functional teams using Agile methodology, participating in sprint planning, daily stand-ups, and code reviews.
- Enhanced performance by profiling applications and optimizing Gradle builds in Linux environments.
- Contributed to CI/CD setup, version control (Git), and automated deployment workflows.

Education

Bachelor of Engineering in Computer Engineering, First Class
University of Pune, India (2022)

Courses

- UI/UX Design – California Institute of the Arts (Coursera)
- Communication Strategies for a Virtual Age – University of Toronto (Coursera)
